# **INNOVATIVE IMAGE SOLUTIONS (IIS)**

WITH THE FULL PICTURE - COVERING ALL ANGLES

IIS is a comprehensive solution with class leading features that addresses the need to capture, store, maintain and view user images pertaining to ATM transactions. With configurable data retention and archiving features, it helps banks meet their compliance goals without compromising on system performance.

## Competitive Advantages

Innovative Pvt. Ltd. provides complete development support for IIS - making customization easier & cost-effective for Banks. Our trained team of developers provide full support for this product so that our customers can enjoy true peace of mind.

Supports 4 Cameras per ATM

AI Enhanced Images

Image Size under 8KBs

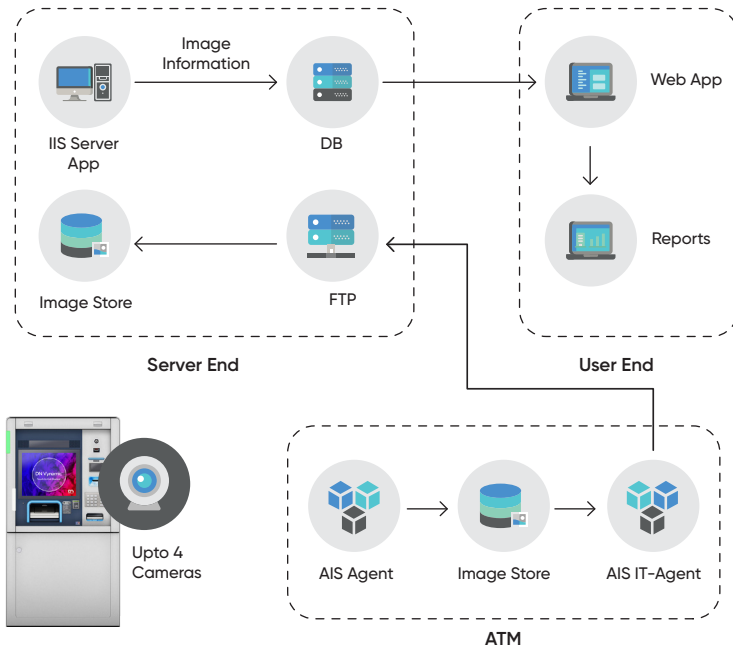

Multi-vendor Solution

Supports Images & Videos

## System Architecture

## System Features And Benefits

IIS has been developed keeping the requirement of banks in Pakistan in view. It includes all key features required by banks to fulfill their regulatory and compliance requirements.

### The Full View

- > Supports 4 cameras – with multiple images per camera
- > Supports external surveillance cameras
- > AI Enhanced images for clarity
- > Supports videos

### Smart Viewability

- > Powerful search capabilities (card number, event, date, time, etc.)
- > Card number masking
- > Device's technical information (full status)
- > Configurable notifications & alerts
- > Customizable reports

### Optimized Storage

- > Image size under 8KBs
- > Real-time image transfer from ATM (agent) to Server (DB)
- > Smart queuing in case of network unavailability
- > Configurable data retention and archiving

### Efficient Administration

- > User rights administration
- > Grouping of monitored devices (bank division, city, region, province, country)
- > Network connection status
- > Disk space monitoring

### Future Proof Architecture

- > 2 Tier Architecture IIS ATM Agent & IIS Server
- > Web Application for stand alone functionality
- > Integration support for Monitoring Solutions (Dynamic View & Innomate)
- > Scheduled data archiving
